

Notification Of Planned Unavailability

Asset	Revision	Date Published	Event Date	Approx Duration	Time Of Current Forecast	Comments
Bacton SEAL	9	#####	#####	53 days	11	Offshore production has restarted and ramp-up is in progress. A 2 day ramp up to normal rates within 48 hours.
Bacton SEAL	8	#####	#####	52 days	11	Start-up is in progress. A 2 day ramp up to normal rates is expected to commence from the 19th September 2017
Bacton SEAL	7	#####	#####	51 days	11	Due to delay estimated restart is now 18th September 2017.
Bacton SEAL	6	#####	#####	50 days	11	Due to delay estimated restart is now 17th September 2017.
Bacton SEAL	5	#####	#####	48 days	11	Due to delay estimated restart is now 15th September 2017.
Bacton SEAL	4	#####	#####	47 days	11	Due to delay estimated restart is now 14th September 2017.
Bacton SEAL	3	#####	#####	45 days	11	Due to delay estimated restart is now 12th September 2017.
Bacton SEAL	2	#####	#####	39 days	11	Due to delay estimated restart is now 6th September 2017.
Bacton SEAL	1	#####	#####	27 days	11	Offshore production has stopped earlier than forecast. A 2 day ramp up to normal rates is forecast to commence on the 25th August 2017
Bacton SEAL	0	#####	#####	27 days	11.5	Ramp down of flows commencing 30th July 2017 2 day ramp up to normal rates will commence on the 26th August 2017
St Fergus	2	#####	#####	~ 48 hours	3	ramp up ongoing, normal rates not expected for another 48 hours.
St Fergus	1	#####	24/06/2017		~6	Offshore ramp is expected from midday, ramp up to normal rates not expected until Monday the 26th.
St Fergus	0	#####	#####	7 days	9	
St Fergus	0	#####	#####	24 hours	8.5	Rates will increase during gas day 20-Apr-2017 and rates will be normal again for gas day 21-Apr-2017
Bacton SEAL	1	#####	#####		9.5	Due to a minor issue with the tide/weather situation, offshore flows ramp up is delayed to gas day 09/04/17.
Bacton SEAL	0	#####	#####		6	Offshore flows are currently reducing but impact on gas day 07/04/17 is minimal. Offshore flows are forecasted to recommence during gas day 08/04/17.
Bacton SEAL	3	#####	#####		6	Gas export has commenced from Elgin Franklin with slow ramp up as per procedures.
Bacton SEAL	2	#####	#####		11	Ramp up delayed, duration unknown
Bacton SEAL	1	#####	#####	20 hours	8.5	Ramp up delayed to 23:00 pm this evening.
Bacton SEAL	0	#####	#####	14 hours	6	Flows currently at 0 mcm/day. Ramp up expected around 5 pm this afternoon.
Bacton SEAL	3	#####	26/03/2017			production restarted overnight. Flows at Bacton SEAL forecast to increase from 29-Mar-17 08:00, ramp up to previous rates over the next 2 days
Bacton SEAL	2	#####	26/03/2017	unknown	12	Third party works complete. Start up tests ongoing, unknown at present when gas export will restart.
Bacton SEAL	1	#####	26/03/2017	36-48 hours	12	Offshore production ramp down on gas day 26th March. Offshore production is planned to stop for 36-48 hours A 2 day ramp up to previous rates is expected once the works are complete
Bacton SEAL	0	#####	26/03/2017	36 hours	12.6	Planned offshore reduction at Elgin Franklin (Bacton SEAL). The flow reduction is due to works being carried out by a third party on the oil export route. The duration and timing are subject to change. Offshore production ramp down on gas day 25th March. Offshore production is planned to stop for 36 hours starting 26th March. A 2 day ramp up to previous rates is expected once the works are complete
St Fergus	2	#####	08/02/2017		4	Issue starting compressor delaying ramp up. Forecast to start compressor this morning with a ramp up to normal rates for gas day 09-Feb-2017
St Fergus	1	#####	07/02/2017		6	Issue starting compressor delaying ramp up. Forecast to start compressor this morning with a ramp up to normal rates for gas day 08-Feb-2017
St Fergus	0	#####	#####	12-18 hours	11	11 mcm/day Flow loss estimated for 12-18 hours. Normal rates expected for gas day 07/02/17.

Notification Of Unplanned Unavailability

Asset	Revision	Date Published	Event Date	Approx Duration	Time Of Current Forecast	Comments
Bacton SEAL	6	#####	28/12/17	7 hours	3	Following a turbo expander trip, offshore flows were reduced, flows now increasing and forecast to be back to previous levels before the start of the next gas day.
Bacton SEAL	5	#####	28/12/2017		1.5	Offshore production is back to normal levels (technical capacity).
Bacton SEAL	4	#####	27/12/2017		4	Elgin Franklin delivery to Bacton SEAL will slowly increase over the course of the day to normal levels
Bacton SEAL	3	#####	27/12/2017			Elgin Franklin delivery to the Bacton SEAL terminal is forecast to start from 1300hrs on Gas Day 27-Dec-2017 at a rate of 3 MCM/D, it will slowly increase over the afternoon to be around 7 MCM/D at 1700 hrs.
Bacton SEAL	2	#####	27/12/2017			Offshore Elgin Franklin production has resumed. Ramp up of gas flows will be linked to ramp up of oil rates.
Bacton SEAL	1	#####	12/12/2017	~3 weeks	10	Update: End Date revised, The duration of the shutdown is not known at present.
Bacton SEAL	1	#####	12/12/2017	n/a	10	Elgin Franklin gas export has had to stop due to the shutdown of the oil export pipeline. The duration of the shutdown is not known at present.
Bacton SEAL	0	#####	11/12/2017		6	Elgin Franklin flows at Bacton SEAL will stop from 2100 today. Due to a restriction on the oil export route for Elgin Franklin, gas export from the field has been reduced by approx 60% from normal levels. The duration is unknown at the moment.
Bacton SEAL	0	#####	07/12/2017		4	Due to a restriction on the oil export route for Elgin Franklin, gas export from the field has been reduced by 60% from normal levels. The duration is unknown at the moment. The impact is uncertain at the moment also.
Bacton SEAL	4	#####			4.9	Normal rates expected during gas day 27-Nov-2017. Elgin Franklin flow rate at Bacton SEAL forecast to be 5.5 MCM/Day at 2100 and will slowly increase to end of this gas day.
Bacton SEAL	3	#####	26/11/2017		6.4	Elgin Franklin restart is ongoing. Current forecast is that flows will increase at Bacton SEAL from 1500 on gas day 26th November. There will be a slow ramp up from 1500.
Bacton SEAL	2	#####	26/11/2017		10.4	An update will be sent once this occurs. This message only relates to Elgin Franklin, not all flow at Bacton SEAL.

Bacton SEAL	1	#####			3	Update: The flows at Bacton SEAL will continue to reduce during the night as the gas landed for Elgin Franklin at Bacton SEAL is only coming from pipeline stock. This message only relates to Elgin Franklin, not all flow at Bacton SEAL. As an end of day value the loss at Bacton SEAL is approximately 3.5 MCM. The original flowrate for today was 10.4 MCM, currently it's around 7 MCM/Day and by 0500 it's forecast to be only 1 MCM/D. A new message for gas day 26-Nov-2017 will be posted later.
Bacton SEAL	0	#####	25/11/2017		3	Investigation ongoing. Initial estimate will be offshore production restarting 0600 26/11/17. There will be a ramp up period for offshore and then an increase in flows at the Bacton SEAL terminal. A further message will be posted when more is known.
Bacton SEAL	4	#####	26/10/2017	3-4 days	3.2	Offshore flows are forecast to remain at 7.5 MCM/D into the weekend when they will increase to technical capacity
Bacton SEAL	3	#####	25/10/2017		7.7	Flows at Bacton SEAL to slowly increase from 2000 (Gas day 25-Oct-2017)
Bacton SEAL	2	#####	25/10/2017		10.7	The plant is being prepared for restart. Offshore gas export is not expected until late afternoon, with a slow increase in flows at Bacton SEAL from this evening. Forecast below assumes worst case of no restart today, an update will be sent when platform restarts
Bacton SEAL	1	#####	24/10/2017		10.7	Restart time unknown
Bacton SEAL	0	#####	23/10/2017		5	Offshore production has stopped, cause currently being investigated.
St Fergus	3	#####	06/09/2017		4.6	Ramp up will continue over gas day 07-Sep-2017. Normal rates expected for gas day 08-Sep-2017
St Fergus	2	07/0917 05:07	06/09/2017		6.7	Offshore flows have restarted. Ramp up will continue over gas day 07-Sep-2017. Normal rates expected for gas day 08-Sep-2017
St Fergus	1	#####	#####		7.4	Impact on within day increased.
St Fergus	0	#####	#####		5.7	Currently in process of restarting offshore flows. Normal rates expected for gas day 07-Sep-2017
St Fergus	3	#####	#####		0	Production now back at full rates.
St Fergus	2	#####	#####	unknown	9	Restart commenced gas-day 16th July, ramp up to full rates over the next 12 hours.
St Fergus	1	#####	#####	unknown	9	Restart is not currently forecast until end of gas-day 15th July/start of gas-day 16th July.
St Fergus	0	#####	#####	unknown	9	Duration currently unknown.
Bacton SEAL	2	#####	#####		2	Maintenance works completed earlier than planned. Offshore rates ramping up to previous levels over the next four hours
Bacton SEAL	1	#####	#####	~ 7 days	4.5	estimated at 7 days
Bacton SEAL	0	#####	#####	~2 days	5	Duration unknown at present estimated at 2 days
Bacton SEAL	4	#####	#####		2	Ramp up ongoing. Normal Flow rates expected before the end of gas day 08/03/17.
Bacton SEAL	3	#####	#####		5	Ramp up delayed until midday tomorrow (gas day 08/03/17).
Bacton SEAL	2	#####	#####		4	Flows ramping up. Normal rates expected for gas day 08/03/17.
Bacton SEAL	1	#####	#####		5	Unplanned Offshore flow reduction at Bacton SEAL terminal (Elgin Franklin). Flow loss of 9 mcm/day over the next 12 hours. Duration unknown.
St Fergus	3	07/03/17 17:26	#####		4	Ramp up ongoing. Normal rated expected for gas day 08/03/17.
St Fergus	2	#####	#####		5	Unplanned Offshore Flow Reduction at NSMP St Fergus Terminal (Greater Laggan Tormore). Duration unknown.
St Fergus	1	#####	#####		4	Ramp up ongoing. Flows are increasing and normal rates are expected from gas day 07/03/17.
St Fergus	0	#####	#####		5	Unplanned Offshore flow reduction at NSMP St Fergus Terminal (Greater Laggan Tormore). Duration Unknown
St Fergus	1	#####	#####		0	Flows ramped up as planned.
St Fergus	0	#####	#####		6	Flow reduction of 6 mcm/day. Ramp up ongoing, flows should be back to normal before the end of gas day.
St Fergus	2	#####	#####		7	Ramp up to full production ongoing
St Fergus	1	#####	#####		11	Flow reduction of 11.0 MCM/D over the remainder of the gas day, duration unknown
St Fergus	0	#####	#####		4.5	Duration unknown
Bacton SEAL	2	#####	#####		0	Flows at Bacton SEAL back to normal.
Bacton SEAL	1	#####	#####		3	Offshore production ramping up. Flows at Bacton SEAL to slowly increase over the course of this gas day.
Bacton SEAL	0	#####	#####		5	Offshore production has tripped. On restart production will be limited to 5 MCM for unknown period
Bacton SEAL	2	#####	#####		4.5	Ramp up on hold, duration unknown. Update will be sent once production increases.
Bacton SEAL	1	17/01/17 09:36	#####		6	Ramp up on hold. Export rate is around 6 mscm/d and will remain at this value for at least 2 days.
Bacton SEAL	0	#####	#####		6
